

# Washing plant ATEX

for cleaning agitators, mixing tanks + hand washing station

- Wash
- Rinse
- suction

## Washing plant ATEX

### CONSTRUCTION / FUNCTION

#### Cleaning in the paint kitchen

In addition to paint containers such as buckets and hobbocs, stirrers can also be cleaned fully automatically in the compact system. For manual cleaning of small parts, the system is equipped with a modern hand washing station.

Use of a ReiTec cleaning system for solvents according to ATEX of the B + R series. The system is characterized by its versatile use with very compact dimensions and low solvent consumption.

### FACILITIES FEATURES

- automatic brush cleaning of buckets and hobbocs
- automatic spray cleaning of agitators
- Hand washing place for manual cleaning of small parts
- Parallel operation of the various plant components
- Central media supply with filtering for solvents
- Control by PLC in combination with an operator panel
- Selection of different cleaning programs with individual time adjustment
- Extraction of vapors in all wash zones
